MODULE-4 · WAR-ROOM DOSSIER

4.4 Adds & Next-Market Expansion Loops — One Station Into a Cascade

Frequency Dominion · Confidential Operating System

THE ONE-LINE TRUTH: An add is not the finish line — it is a live seed. The Expansion Loop converts a single station victory into a domino cascade across neighboring regional markets.

MASTERCLASS DIRECTIVE & STRATEGIC BLUEPRINT

Strategic Foundation & Operational Reality

When amateur artists secure a radio add, they celebrate on social media for 24 hours and consider the campaign finished. This is like striking oil and walking away without drilling a pipeline.

In the music broadcasting industry, radio programmers monitor each other relentlessly. Non-comm and college music directors review Spinitron charts and NACC Top 200 reports weekly. Commercial programmers track Mediabase and BDS spin logs. When a recognized tastemaker station in a regional cluster adds a record, every neighboring station in that geographic corridor immediately experiences a drop in perceived risk.

Dominion operators execute the **Cascade Expansion Loop**.

The instant an add is confirmed at Station 1, that add becomes the lead S-Tier proof weapon to breach Stations 2, 3, 4, and 5 in the surrounding market perimeter.

The Anatomy of the Cascade Expansion Pitch

When you secure an add at a respected anchor station (e.g., WNUR in Chicago), you immediately dispatch a targeted **Cascade Payload** to adjacent Ring 2 and Ring 3 stations (e.g., WMSE in Milwaukee, WERG in Erie, WLRA in Romeoville):

- The Subject Line: `WNUR Add Cascade: Midwest Indie-Rock (2:58) · For [Target MD Name] / [Target Station]`
- The Body Copy (Under 65 Words): “Hi [Name] — thought you’d want this for your evening specialty queue: our single ‘[Track Title]’ was added into rotation at WNUR this week following our sold-out Empty Bottle showcase. 2:58 run-time, FCC Clean, driving post-punk. Streaming link & Broadcast WAV: [Link]. Open to bringing this to [Target Station] listeners this week?”

The 4-Phase Geographic Expansion Architecture

1. **Phase 1: The Anchor Add (Ring 1 Foothold):** Secure your primary station add in your home metro. Document the spin with official Spinitron timestamp screenshots.
2. **Phase 2: The Corridor Cascade (Ring 2/3 Sweep):** Within 48 hours of the anchor add, pitch the 10 closest regional stations in the same broadcast district citing the anchor add as lead validation.
3. **Phase 3: The Chart Stacking (NACC / Specialty Aggregation):** When 3 to 5 regional stations report spins, aggregate your spin totals to break onto regional college charts (e.g., NACC 200 or Regional Roots Charts).

4. **Phase 4: The Commercial Specialty Bridge:** Deploy your college chart standing and multi-station broadcast proof to pitch evening specialty spotlight shows on commercial powerhouse stations (e.g., WXRT, KROQ, KNDD).

IMPLEMENTATION DRILLS & PASS STANDARDS

- **Drill 1 — The Expansion Target Mapping Sprint (25 min).** For your #1 target anchor station, identify five direct geographic or format sibling stations in adjacent markets. Populate the Cascade Expansion Worksheet below.
- **Drill 2 — The Cascade Pitch Template Construction (20 min).** Draft a customized Cascade Payload referencing your anchor station's confirmed spin. Ensure the copy sits strictly under 65 words.
- **Drill 3 — The Airplay Receipt Capture Drill (15 min).** Set up real-time Google Alerts and Spinitron tracking for your artist name and song title. Prepare a high-resolution screenshot template for logging on-air proof.
- **Drill 4 — The Tour Corridor Linkage (20 min).** Map how your cascading radio adds connect directly into your upcoming live performance tour routing.

ACTION WORKSHEET & OPERATIONAL PROTOCOL

Protocol Document: `CASCADE EXPANSION LOOP TARGETING TRACKER`

Complete the structured table below as part of your lesson implementation. This worksheet directly replaces legacy spreadsheets with a publication-grade execution protocol.

Anchor Station Win	Add Confirmation Date	Cascade Target Station	Market & Dial	Cascade Angle & Hook	Deployment Status
WNUR 89.3 (Evanston)	Day 9 Verified Add	WMSE 91.7 FM	Milwaukee, WI	Midwest regional I-94 corridor tie	Cascade Dispatched Day 10
WNUR 89.3 (Evanston)	Day 9 Verified Add	WICB 91.7 FM	Ithaca, NY	Leading college chart sibling format	Cascade Dispatched Day 10
WLUW 88.7 (Chicago)	Day 16 Verified Add	WERG 90.5 FM	Erie, PA	Rust Belt independent rock connection	Staged for Wave 3
WLUW 88.7 (Chicago)	Day 16 Verified Add	WSUM 91.7 FM	Madison, WI	Big Ten campus corridor synergy	Staged for Wave 3
WMSE 91.7 (Milwaukee)	Day 15 Verified Add	Radio K 100.7 FM	Minneapolis, MN	Twin Cities Midwest powerhouse hook	Staged for Wave 3

WAR-ROOM NOTES

WAR-ROOM DIRECTIVE — 4.4 Adds & Next-Market Expansion Loops — One Station Into a Cascade

LEVERAGING A ROTATION UPGRADE AS A SECONDARY WIN

When a station adds your song into light rotation or specialty play, your job at that station is not finished. You now initiate the **Rotation Upgrade Sequence**:

1. **Monitor On-Air Reaction:** When your track airs, rally your regional community to tweet or text polite appreciation to the station studio line (“Loved hearing [Artist Name] on the evening drive block!”).
2. **The Listener Feedback Receipt:** Within 10 days of the first spin, email the music director a brief note: “Hi [Name] — thank you again for the spins on [Track Title]. We’ve seen a 30% spike in local Shazams across [City] and our club date on [Date] just sold out. If listener response warrants, we’d be thrilled to be considered for regular daytime medium rotation.”
3. Moving from light specialty play to medium daytime rotation increases your weekly broadcast impressions by 400%.

FREQUENCY DOMINION COMMUNITY DRILLS

1. Share your primary Anchor Station add and the five Cascade targets you have mapped around it.
2. Post your Cascade Pitch copy for critique. Ensure the anchor add is highlighted in the first 10 words.
3. Celebrate a peer’s recent station add by helping them identify adjacent sibling stations to target in their expansion loop.
4. Discuss your strategy for converting specialty show spins into permanent daytime rotation upgrades.
