5.4 Relationship Compounding — The 90-Day Ally Engine

Frequency Dominion · Confidential Operating System

THE ONE-LINE TRUTH: One radio add is a transaction. Thirty lifetime allies is an unbreachable commercial moat. The 90-Day Ally Engine compounds relationships on a calendar schedule that never sleeps.

MASTERCLASS DIRECTIVE & STRATEGIC BLUEPRINT

Strategic Foundation & Operational Reality

The fatal flaw of the independent music business is cyclical amnesia. An artist launches a campaign, works furiously for three weeks, lands four station adds, and then disappears into the studio for eight months. When their next record is finished, they re-emerge to discover that programmers have changed jobs, email threads have gone cold, and they are forced to rebuild their momentum from absolute zero.

Dominion operators operate an institutional CRM: the **90-Day Ally Engine**.

A music director who has added your record once is 5x more likely to add your next record than a stranger —provided you maintain relational continuity between releases. You do not let relationships decay. You maintain an active portfolio of station champions through a disciplined, low-friction quarterly maintenance cadence.

The 30/10/10 Relational Portfolio Model

Your active industry network is organized into three distinct operational tiers:

- **30 Lifetime Allies (The Base Portfolio):** Every station programmer, specialty host, college DJ, or booking agent who has ever played your music, replied to an email, or attended a show. Logged in your master ledger with personal notes, format preferences, and station anniversaries.
- **10 Warm Champions (The Mid-Tier Pipeline):** Programmers who have expressed genuine personal appreciation for your sound, conducted an in-studio interview, or added multiple tracks. Maintained with bi-monthly value drops.
- **10 Active Campaign Targets (The Firing Line):** The 10 priority stations currently being worked for your active single or upcoming tour date.

The 4-Beat Quarterly Maintenance Loop

Every 90 days, execute this four-phase operational loop across your entire 30-member ally base:

1. **Beat 1: The New Release Pre-Flight (Day 0):** Dispatch your 90-word pitch to all 30 allies two weeks prior to general public release, framed as an exclusive advance preview for long-time supporters.
2. **Beat 2: The Mid-Cycle Value Drop (Day 30):** Deliver an unreleased acoustic cut, live soundboard recording, or custom station sweeper with zero commercial ask.
3. **Beat 3: The Check-In & Service Inquiry (Day 60):** Reach out with a brief, warm note: “Hi Tom — hope the quarterly ratings book treated WMSE well. Any upcoming local programming specials we can support or amplify for you this fall?”

4. **Beat 4: The Quarterly Portfolio Audit & Re-Ranking (Day 90):** Review the entire 30-member roster. Re-rank allies, retire inactive contacts to cold archives, and promote promising new station relationships into the active Top 30.

IMPLEMENTATION DRILLS & PASS STANDARDS

- **Drill 1 — The 30-Member Ally Portfolio Assembly (45 min).** Aggregate every programmer, DJ, and tastemaker who has ever supported your music. Populate the 30/10/10 Relationship Ledger below.
- **Drill 2 — The Quarterly Calendar Rhythm Lockdown (15 min).** Schedule four recurring quarterly review dates in your annual calendar: March 31, June 30, September 30, December 31. Label them: 'Dominion 90-Day Ally Engine Audit.'
- **Drill 3 — The Uncontaminated Mid-Cycle Value Drop Staging (20 min).** Prepare two unreleased audio assets (an acoustic demo or live concert board mix) to deploy as your Day 30 value drops.
- **Drill 4 — The Gatekeeper Life Event Log (15 min).** Document personal details for your Top 10 Warm Champions: station anniversaries, favorite local sports teams, or preferred coffee/vinyl preferences.

ACTION WORKSHEET & OPERATIONAL PROTOCOL

Protocol Document: `30/10/10 RELATIONSHIP COMPOUNDING LEDGER`

Complete the structured table below as part of your lesson implementation. This worksheet directly replaces legacy spreadsheets with a publication-grade execution protocol.

Ally Name & Title	Station & Market	Portfolio Tier	Last Meaningful Touch Date	Next Scheduled Value Drop	Preferred Engagement Channel
Sarah Jenkins (MD)	WLUW 88.7 (Chicago)	Warm Champion (10)	September 15	October 30 (Live Acoustic Cut)	Direct Office Phone / Email
Alex Rivera (MD)	WNUR 89.3 (Evanston)	Warm Champion (10)	September 20	October 30 (Live Acoustic Cut)	Station Studio Drop-In
Tom Crawford (PD)	WMSE 91.7 (Milwaukee)	Warm Champion (10)	October 4	November 15 (Exclusive Vinyl Mailer)	Direct Email / In-Person Gig
Marcus Vance (MD)	Radio K (Minneapolis)	Active Target (10)	October 8	October 22 (Touch 2 Asset)	Email Thread / Spinitron
Elena Rostova (MD)	WCSB 89.3 (Cleveland)	Lifetime Ally (30)	August 12	November 1 (Pre-Release Advance)	Direct Email

WAR-ROOM NOTES

WAR-ROOM DIRECTIVE — 5.4 Relationship Compounding — The 90-Day Ally Engine

THE COMPOUND VALUE OF A MUSIC DIRECTOR PROMOTION

College and non-commercial music directors do not stay in college radio forever. The junior music director at a university station today will become the assistant program director at a major AAA station in five years, and a senior music supervisor at a television network in eight years.

When you treat young student DJs with the same profound respect, punctuality, and gratitude that you show commercial PDs, you are planting seeds across the future institutional leadership of the global music industry.

When they transition to major commercial stations or film studios, you will be one of the few artists whose emails they open on Day 1.

FREQUENCY DOMINION COMMUNITY DRILLS

1. Post your completed 30/10/10 Relationship Ledger (redacting personal phone numbers).
2. Share an example of a relationship that compounded over multiple releases into unexpected commercial success.
3. What unreleased value asset have you chosen for your Day 30 Mid-Cycle Drop?
4. Confirm that your recurring 90-day calendar audit blocks are officially scheduled.
