MODULE 2 OF 6

MODULE 2 · Target Architecture

Precision is the new volume.

A complete premium course module — overview, lesson-by-lesson, capstone, quiz, and takeaways.

FULL-LENGTH MODULE GUIDE · TRAINING EDITION

RADIOREACH.US · THE RADIO OWNERSHIP SYSTEM

MODULE OVERVIEW

Volume is dead; precision is the new volume. Target Architecture turns radio from a random blast into a surgical map — a hometown heat map, tour leverage, an analyst-grade scoring system, and a 20-station command center that never sleeps.

BY THE END OF THIS MODULE YOU WILL

- Build the hometown heat map and tier every market.
- Use tour pre-roll to manufacture demand with dates.
- Score stations like an analyst, on playlist evidence.
- Construct a 20-station war room allocated by outcome.

THE LESSON MAP

LESSON 2.1 · The Hometown Heat Map

Find the stations that can’t say no.

★ **INSIDER RADIO TIP**

Tier the markets, not just the rings: college towns (hungry, weekly cycles), mid metros (moderate pressure), PPM metros (conservative). Map at least 2 college towns first — that lane produces proof faster than any commercial station.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T21 · The Hometown Heat Map in the module’s Templates folder.

LESSON 2.2 · Tour Pre-Roll

Manufacture airplay demand with dates.

★ **INSIDER RADIO TIP**

The show’s aftermath is the real asset. Send a 20-second vertical crowd clip on the night itself; the next-day ‘we’re still talking about it’ email is the strongest thank-you in the economy.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T22 · Tour Pre-Roll in the module’s Templates folder.

LESSON 2.3 · The Format Scoring System

Rank every station like an analyst.

★ **INSIDER RADIO TIP**

Score the playlist, not the website. Pull the last 10–15 songs a station actually plays via stream logs and plot tempo, energy and era — that ‘neighborhood’ is your real target definition.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T23 · The Format Scoring System in the module's Templates folder.

LESSON 2.4 · The 20-Station War Room

Build the command center that never sleeps.

★ **INSIDER RADIO TIP**

Allocate the war room by outcome: 10 slot shops, 6 ladder shops, 3 market-makers, 1 wildcard. Keep it at exactly 20 rows even as the map grows — growth is new campaigns, not bigger rows.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T24 · The 20-Station War Room in the module's Templates folder.

CAPSTONE ASSIGNMENT

[

MODULE 2 DELIVERABLE

Deliver your Target Map: a heat map with at least two college towns, five scored stations on playlist evidence, and a locked 20-station war room with every row carrying an outcome role.

Pass standard: complete the deliverable before starting Module 3.

MODULE QUIZ

[

Q1. Which lane produces proof the fastest?

Answer: The college / specialty lane with its weekly cycles.

] [

Q2. Why tier the markets?

Answer: Because college, mid-metro, and PPM markets each run on different physics.

] [

Q3. What is the aftermath asset after a show?

Answer: A night-of crowd clip plus a next-day 'still talking' email.

] [

Q4. What should you score — the playlist or the website?

Answer: The playlist — it's the truth; the format label is a rumor.

] [

Q5. What is the 20-station allocation?

Answer: 10 slot shops, 6 ladder shops, 3 market-makers, 1 wildcard.

]

KEY TAKEAWAYS

CARRY THESE FORWARD

- Geography lowers ask risk.
- College is the fast lane.
- Score the playlist.
- Concentrate on 20.

BRIDGE TO THE NEXT MODULE

Your map is set — now arm it with the messages and assets that make a programmer stop scrolling. That’s the Pitch Weapon.
