MODULE 4 OF 6

MODULE 4 · The 21-Day Campaign

Burn nothing. Own everything.

A complete premium course module — overview, lesson-by-lesson, capstone, quiz, and takeaways.

FULL-LENGTH MODULE GUIDE · TRAINING EDITION

RADIOREACH.US · THE RADIO OWNERSHIP SYSTEM

MODULE OVERVIEW

Hoping is not a campaign. The 21-Day Campaign is the operating rhythm: load every station before you fire, send in timed waves, follow up three times with value and grace, then let one add cascade into a market.

BY THE END OF THIS MODULE YOU WILL

- Run a load sequence that arms every station before send.
- Execute first sends in timed waves on the weekly cycle.
- Run the three-touch follow-up with value and grace.
- Convert adds into next-market expansion loops.

THE LESSON MAP

LESSON 4.1 · The Load Sequence

Arm every station before you send.

★ **INSIDER RADIO TIP**

Give the campaign an official impact date and service the record 1–2 weeks ahead of it. PDs are calendar animals — a date converts ‘maybe’ into ‘when?’

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T41 · The Load Sequence in the module’s Templates folder.

LESSON 4.2 · First Sends

Time the waves and the 4-hour rule.

★ **INSIDER RADIO TIP**

Ride the weekly rotation cycle: wave 1 on Tuesday, wave 2 on Thursday, touch-3 the next Monday on a fresh board. Every Monday is the refresh heartbeat.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T42 · First Sends in the module’s Templates folder.

LESSON 4.3 · The 3-Touch Follow-Up

Persistence without the stench.

★ **INSIDER RADIO TIP**

Rotation upgrades are the real follow-up. Four weeks after an add, ask for the light→medium upgrade with receipts. Almost no independent makes that ask — that’s exactly why it works.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T43 · The 3-Touch Follow-Up in the module's Templates folder.

LESSON 4.4 · Adds & Next-Market Expansion

Turn one station into a cascade.

★ **INSIDER RADIO TIP**

Adds land in waves. When 2–3 hit in one morning, the cycle is turning — re-fire with the fresh receipts same-day and turn that morning into 11 by Friday.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T44 · Adds & Next-Market Expansion in the module's Templates folder.

CAPSTONE ASSIGNMENT

[

MODULE 4 DELIVERABLE

Run a live 21-day campaign on your locked 20 stations: load the sequence, fire two waves, execute three touches, and log every add. Produce a results log showing wave timing and outcomes.

Pass standard: complete the deliverable before starting Module 5.

MODULE QUIZ

[

Q1. When do you fire?

Answer: Only at armed stations.

] [

Q2. What converts 'maybe' into 'when?'

Answer: An official impact date.

] [

Q3. What day does wave 1 ride?

Answer: Tuesday, on the weekly rotation cycle.

] [

Q4. How many touches, and in what order?

Answer: Three, value then grace.

] [

Q5. When do you ask for a rotation upgrade?

Answer: About four weeks after an add.

]

KEY TAKEAWAYS

CARRY THESE FORWARD

- Load before fire.
- Ride the weekly cycle.
- Three touches, value to grace.
- Adds cascade.

BRIDGE TO THE NEXT MODULE

Campaigns win stations; relationships win careers. That’s Human Frequency.
