MODULE 6 OF 6

MODULE 6 · The Empire Loop

Convert airplay into an empire.

A complete premium course module — overview, lesson-by-lesson, capstone, quiz, and takeaways.

FULL-LENGTH MODULE GUIDE · TRAINING EDITION

RADIOREACH.US · THE RADIO OWNERSHIP SYSTEM

MODULE OVERVIEW

A single add is not a business. The Empire Loop converts airplay into income and systems — proof compounding, a placement package, a quarter-dominating release calendar, and a 90-day audit that ascends you to the next tier.

BY THE END OF THIS MODULE YOU WILL

- Compound every spin into reusable proof assets.
- Convert airplay into verifiable placement income.
- Plan a release calendar that dominates quarters.
- Run the 90-day audit and ascend on gates.

THE LESSON MAP

LESSON 6.1 · Proof Compounding Systems

Turn every spin into a weapon.

★ **INSIDER RADIO TIP**

Proof is perishable: 7-day-old reads as ‘now’, 90-day-old reads as ‘history’. Refresh the EPK’s receipts weekly and archive the old ones for the press kit.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T61 · Proof Compounding Systems in the module’s Templates folder.

LESSON 6.2 · Airplay-to-Income

Convert frequency into money.

★ **INSIDER RADIO TIP**

The chart (NACC / RMR) is the currency supervisors actually check. Build the one-page placement package (chart proof + 30-sec cut + stems + contact) before you need it.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T62 · Airplay-to-Income in the module’s Templates folder.

LESSON 6.3 · The Release Calendar

Dominate quarters, not just weeks.

★ **INSIDER RADIO TIP**

Timing is market-attention windows: Q1 post-holiday open, Q2 spring/summer booking, Q3 fall breakout, Q4 closed. Never release into Q4 as an unknown — use it for the annual audit.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T63 · The Release Calendar in the module's Templates folder.

LESSON 6.4 · The 90-Day Audit & Ascension

Scale the system to a real business.

★ **INSIDER RADIO TIP**

The audit is a business review: one kill/keep, one scale/hold, one ascension decision. Sign the next-quarter memo with ONE commitment — machines compound on single repairs.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T64 · The 90-Day Audit & Ascension in the module's Templates folder.

CAPSTONE ASSIGNMENT

[

MODULE 6 DELIVERABLE

Complete your Empire Review: build the placement package, set the 12-week release calendar, run the full 90-day audit, and sign a one-commitment next-quarter memo.

Pass standard: complete the deliverable before starting Module 7.

MODULE QUIZ

[

Q1. How many assets does each spin become?

Answer: Four.

] [

Q2. How often do you refresh proof?

Answer: Weekly, on a 7-day cycle.

] [

Q3. What does the placement package contain?

Answer: Chart proof, a 30-sec cut, stems, and contact.

] [

Q4. When do you never release as an unknown?

Answer: Q4 — it's the closed window.

] [

Q5. How many commitments does the next-quarter memo carry?

Answer: Exactly one.

]

KEY TAKEAWAYS

CARRY THESE FORWARD

- Proof compounds.
- The chart is currency.
- Twelve-week cadence.
- The audit ascends.

BRIDGE TO THE NEXT MODULE

You’ve closed the loop. Re-run the 90-day audit, ascend the gates, and scale toward a done-for-you campaign team.
