THE 90-DAY AUDIT — Quarterly Command Checklist

60 minutes, every 90 days. Five columns, one weakest-column fix, one signed memo. Repeats forever.

PART 1 — THE DATA PULL (10 minutes)

Data source	Where	Pulled?
War room — statuses + next actions	Module 2.4 template	☐
Follow-up tracker — touches, replies	Module 4.3 template	☐
Proof log — adds, assets, deployments	Module 6.1 template	☐
Income ledger — lanes, amounts	Module 6.2 template	☐
Ally engine — 30/10/10 tiers	Module 5.4 template	☐
Release calendar — gates, checkpoints	Module 6.3 template	☐

PART 2 — THE SCORECARD (25 minutes)

Column	What it measures	Score 1–10	Data evidence
Momentum	Adds, replies, touches, proof assets		
Reach	Stations, markets, cities entered		
Revenue	Attributed lane income		
Relationship	30/10/10 portfolio health		
System	Gate passes, calendar adherence, ledger gaps		

TOTAL: / 50

PART 3 — THE THREE FINDINGS (10 minutes)

- **What worked** (name the exact system component + the number):
- **What didn't** (name the exact component + the number):
- **THE ONE CHANGE** (single surgical fix — weakest column):

PART 4 — THE NEXT QUARTER'S PLAN (10 minutes)

Item	Decision
Calendar dates (next release, W-8 gate)	
Target expansion (20 → 30 → 40 stations?)	
Lane focus (tickets / placements / streams / merch / sponsor / deals)	
One column to repair	
One commitment (name it, date it)	

PART 5 — THE SIGNATURE (5 minutes)

[

> I reviewed the data honestly, named my weakest column, and commit to one surgical change for the next 90 days.

Signature: Date:

THE ASCENSION GATES (CHECK YOURSELF)

Gate	Requirement	Your numbers
Operator → Dominant	3 campaigns × 5+ adds; 1 revenue lane; audit ≥ 30	
Dominant → Empire	3 releases × 15+ adds; 3 revenue lanes; audit ≥ 40; 10+ active allies in one market	
Empire → $1M funnel	80+ stations, 5 markets, staffed team, sustained lane revenue	

Rule: don't ascend until the gate is passed. Repair the weakest column first. Scaling a breaking machine multiplies the breakage.
