2. THE THREE RULES OF ARSENAL DEPLOYMENT

1. **Rule 1: Customize Every Payload:** Never deploy a formula verbatim without inserting specific station callsigns, music director names, verified run-times, and local venue dates. Specificity is the universal signal of respect.
2. **Rule 2: Respect the Lifecycle Ladder:** Do not jump ahead to Cascade pitches before securing your initial anchor add. Follow the sequence: Hometown Heat Map → 20-Station War Room → Load Sequence → First Sends → Follow-Up → Gratitude → Cascade.
3. **Rule 3: Maintain Operational Ledger Hygiene:** Every interaction generated through these tools must be recorded in your tracking ledgers within 60 minutes. Unlogged campaigns are unmanaged campaigns.
