3.3 The One-Page EPK That Commands Attention

Frequency Dominion · Confidential Operating System

THE ONE-LINE TRUTH: Your Electronic Press Kit is not a promotional brochure — it is a single-screen Command Deck designed to give a gatekeeper all critical operational facts in 20 seconds.

MASTERCLASS DIRECTIVE & STRATEGIC BLUEPRINT

Strategic Foundation & Operational Reality

The traditional independent artist Electronic Press Kit (EPK) is a catastrophic failure of information architecture. Artists assemble multi-page PDF documents packed with high-resolution 10MB photo collages, extensive poetic philosophical essays on their upbringing, broken YouTube video embeds, and convoluted quote walls.

No working radio programmer, festival talent buyer, or music journalist has ever read a 12-page EPK.

In the Dominion operating doctrine, your EPK is a **One-Page Command Deck**. It is engineered for a gatekeeper operating under extreme time pressure. A music director must be able to glance at your Command Deck and absorb six critical data blocks in under 20 seconds without zooming, panning, or navigating complex sub-menus.

The Six Mandatory Blocks of the Command Deck

1. **Block 1: Hero Identity & Visual Authority:** A single, razor-sharp, horizontal landscape photograph displaying high visual charisma and distinct artistic styling. Overlay your artist name, hometown metro, and genre classification. Zero cluttered logos or amateur text treatments.
2. **Block 2: The 80-Word Executive Bio:** An objective, third-person executive summary answering three questions: Who are you? What is your signature sonic proposition? What major commercial or live milestones have you achieved? Strike all poetic musings.
3. **Block 3: Embedded Broadcast Audio Player:** An immediate, zero-friction audio player featuring your lead radio single prominently at the top, complete with an instant “Download Broadcast Master WAV” button. Include two secondary focus tracks below.
4. **Block 4: The Verifiable Proof Wall:** Four visual receipt badges: station callsigns currently spinning your record, verified quote excerpts from reputable publications, and confirmed ticket sales receipts.
5. **Block 5: Confirmed Live Routing & Tour Dates:** A clean chronological listing of upcoming live dates displaying Date, City, Venue, and Capacity. If routing is regional, clearly highlight hometown dates.
6. **Block 6: Direct Commercial Contact Information:** Direct email and mobile telephone numbers for the artist, management, or booking representative. Eliminate generic contact forms.

IMPLEMENTATION DRILLS & PASS STANDARDS

- **Drill 1 — The 80-Word Bio Surgery (30 min).** Draft an 80-word executive bio for Block 2 using the template below. Ensure it contains zero empty hype adjectives and at least two verifiable objective facts.

- **Drill 2 — The Single-Screen Layout Audit (30 min).** Assemble your One-Page Command Deck using HTML/CSS or a clean responsive landing page builder. Verify that Blocks 1, 2, and 3 are visible above the fold on desktop and tablet screens.
- **Drill 3 — The Dead Link & Speed Audit (15 min).** Test every single hyperlink, audio player button, and download link on your Command Deck. Page load time must clock under 1.5 seconds on mobile data.
- **Drill 4 — The 20-Second Civilian Comprehension Test (15 min).** Hand your phone with your Command Deck open to a friend or colleague for exactly 20 seconds, then take it back. Ask them: What genre do I play? Where am I from? What station plays me? If they cannot answer, redesign for clarity.

ACTION WORKSHEET & OPERATIONAL PROTOCOL

Protocol Document: `ONE-PAGE EPK ARCHITECTURE SPECIFICATION`

Complete the structured table below as part of your lesson implementation. This worksheet directly replaces legacy spreadsheets with a publication-grade execution protocol.

Command Deck Block	Required Content Elements	Technical Specification	Target Read-Time	Verification Metric
Block 1: Hero Visual	Charismatic promo photo, genre tag, city	1920x1080 compressed WebP (<250kb)	3 seconds	High-contrast visual authority
Block 2: Executive Bio	80-word objective commercial summary	Clean typography, 15px+ body font	7 seconds	Zero poetic fluff; 2 verified facts
Block 3: Audio Deck	Lead single stream + Broadcast WAV button	HTML5 embedded player + metadata	4 seconds	1-click instant playback, no signup
Block 4: Proof Wall	Station logos, quote snippets, ticket counts	4 visual proof cards with source links	3 seconds	Third-party validation visible
Block 5: Tour Routing	Upcoming 90-day dates, venues, capacities	Clean tabular chronological list	2 seconds	Proves active market ground game
Block 6: Direct Contact	Direct phone, email, management details	Click-to-call / click-to-email links	1 second	Zero barrier to gatekeeper outreach

WAR-ROOM NOTES

WAR-ROOM DIRECTIVE — 3.3 The One-Page EPK That Commands Attention

THE HOSTING ARCHITECTURE: NEVER SEND AN ATTACHED PDF AS AN EPK

Sending an attached PDF as your primary press kit is a legacy practice from 2008. PDFs render poorly on mobile screens, require pinch-to-zoom navigation, cannot embed live responsive audio players, and consume mobile data allowances.

DOMINION EPK PROTOCOL:

1. **The Web-Native Single URL:** Host your One-Page Command Deck at a dedicated clean URL: `artistname.com/epk` or `artistname.com/radio`.
2. **Password-Free Access:** Never put a password on your press kit. A gatekeeper arriving from a cold pitch will immediately close the tab if confronted with a password gate.

3. **Dedicated Radio Focus:** If possible, create a sub-variant at `artistname.com/radio` that places the Broadcast WAV download link and station quote badges directly in the hero block above all other elements.

FREQUENCY DOMINION COMMUNITY DRILLS

1. Post your live One-Page Command Deck URL for peer testing.
2. Share your 80-Word Executive Bio for line-by-line editorial feedback.
3. Report your Command Deck mobile page speed score from Google PageSpeed Insights.
4. Did your Command Deck pass the 20-Second Civilian Comprehension Test? What did your test subject remember?
