THE 90-SECOND RADIO-READY AUDIO SCRIPT VAULT

10 complete, voice-ready scripts. Record with the 5-act structure below. Every script fits 90 seconds at a normal broadcast pace (≈130–140 wpm).

THE 5-ACT STRUCTURE (NON-NEGOTIABLE)

Act	Time	Job
1	0:00–0:10	The hook — most undeniable 10 seconds of the song, no intro
2	0:10–0:25	The voice drop — 15 words of spoken intro
3	0:25–0:50	The second hook — the money moment, loudest
4	0:50–1:15	The story voice — date, city, venue, one proof line
5	1:15–1:30	The CTA — one request, one call-to-action

Recording rules: one take per line, record vocals after the hook (pick vocal dynamics to match), master to −14 LUFS, true peak under −1 dBTP, export WAV + MP3, name file `ARTIST-SONG-90SEC`.
