MODULE 1 OF 6

MODULE 1 · Command Identity

You are not a pitch. You are a frequency.

A complete premium course module — overview, lesson-by-lesson, capstone, quiz, and takeaways.

FULL-LENGTH MODULE GUIDE · TRAINING EDITION

RADIOREACH.US · THE RADIO OWNERSHIP SYSTEM

MODULE OVERVIEW

Before you touch a single station, stop acting like an artist hoping to be heard and start acting like a frequency owner. Command Identity prices your silence, reframes radio as a market, builds the evidence vault that makes programmers say yes, and swaps begging for precision.

BY THE END OF THIS MODULE YOU WILL

- Adopt an owner identity instead of a beggar identity.
- Price the Unheard Tax in real dollars.
- Treat every station as a customer with a measurable need.
- Build the proof stack and sign the No-Spam Oath.

THE LESSON MAP

LESSON 1.1 · The Unheard Tax

Quantify exactly what being ignored costs you.

★ **INSIDER RADIO TIP**

Silence compounds negatively. The Unheard Tax isn't just missed airplay — it's missed compounding. Run the tax audit quarterly, not once; a number on paper beats any motivation speech.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T11 · The Unheard Tax in the module's Templates folder.

LESSON 1.2 · Station-As-Customer

Treat radio as a market, not a favor.

★ **INSIDER RADIO TIP**

A PD's yes is a ratings bet, not a taste vote. Ask what a new record needs to fit the format, then mirror the PD's own wording back in the pitch. Their language is the acceptance criteria.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T12 · Station-As-Customer in the module's Templates folder.

LESSON 1.3 · The Proof Stack

Build the evidence vault that makes PDs say yes.

★ **INSIDER RADIO TIP**

Proof is market-weighted — a spin in the target's metro outranks 100k global streams. Tag every receipt with a market and build per-market proof shelves. Never show Austin receipts in a Boston pitch.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T13 · The Proof Stack in the module's Templates folder.

LESSON 1.4 · The No-Spam Oath & Identity Shift

Go from beggar to dominion owner.

★ **INSIDER RADIO TIP**

The No-Spam Oath is a capacity rule — three touches keeps your relationship bank in credit for the next release. Keep a 'not now' folder: it's a recheck calendar of future allies, not a graveyard.

LESSON DRILL

Complete the drills in the masterclass dossier and pass the pass standards.

ACTION WORKSHEET

Fill in T14 · The No-Spam Oath & Identity Shift in the module's Templates folder.

CAPSTONE ASSIGNMENT

[

MODULE 1 DELIVERABLE

Complete the Command Identity sheet: run the Unheard Tax audit and pin the number, draft a one-page station-as-customer brief for your top station, inventory your proof stack, and sign the printed No-Spam Oath.

Pass standard: complete the deliverable before starting Module 2.

MODULE QUIZ

[

Q1. What is the Unheard Tax?

Answer: The compounding cost of every release cycle without broadcast airplay — reach, revenue, and leverage.

] [

Q2. What is a programmer's 'yes' really?

Answer: A ratings bet, not a taste vote.

] [

Q3. What outranks 100,000 global streams in a pitch?

Answer: A verified spin in the target's metro.

] [

Q4. Why does the No-Spam Oath limit you to three touches?

Answer: Precision and capacity keep your relationship bank in credit for the next release.

] [

Q5. What is the 'not now' folder?

Answer: A recheck calendar of future allies, not a graveyard of failure.

]

KEY TAKEAWAYS

CARRY THESE FORWARD

- Silence is an expense.
- A station is a customer.
- Proof precedes the pitch.
- Precision is the brand.

BRIDGE TO THE NEXT MODULE

With an owner’s identity and a proof stack in hand, you’re ready to decide exactly which stations to pursue. That’s Target Architecture.
